Medical Innovations Incubator GmbH

4C ACCELERATOR TÜBINGEN #5

FOR MEDICAL LIFE SCIENCE STARTUPS

WHAT IS IT ABOUT?

C1 | Commercialization: How do I generate revenue in the healthcare sector?

C2 |Certification: How does the certification of my product and my company work?

C3 |Clinical Studies: How do I prove safety and performance of my product?

C4 |Copyright: How can I use data and property rights for my own advantage?

WHAT IS THE GOAL?

- You will have identified corresponding barriers to **shorten the time-to-market** and considered them in an individual project plan
- You will be familiar with the **reimbursement options** in the healthcare market (e.g., self-payer, AMNOG or selective contracts)
- You will know how **quality management systems** (e.g., ISO 13485, Good manufacturing practice (GMP)) and regulatory processes become a strategic concept and how they effectively lead to **approval of your product** (e.g., Medical Device Regulation, In-Vitro-Diagnostic Regulation, Medicinal Products Act)
- You will be able to assess whether and what kind of **clinical studies** you need and how to best implement them (e.g., ISO 14155, ICH Guidelines)
- You will know how to deal with **data protection** requirements (DSGVO) and how to **strategically protect** and exploit intellectual property rights (e.g., patent)

HOW IS THE PROCEDURE?

Apply!	**Assessment**	**Feedback**	**Kick-off**	**Online Workshops**	**Ongoing Coaching**
